

## GREEN PUBLISHING

---

[www.greenpublishing.com.au](http://www.greenpublishing.com.au)

### Water Management

Have a grey water system in place and also use tank water.

### Waste Management

- Putting more information on the web and less in print
- Promote the use of recycled paper stock and recycle as much office equipment as possible
- Producing publications using sustainable and responsible design
- Offering a paperless registration service for event hosts.

### Energy Management

- Using low-energy bulbs and have implemented an eco-friendly management system regarding the use of energy
- Using eco-friendly web hosts
- Reducing carbon emissions through the use of green energy.

### Programs currently participating in

- Greenbizcheck - about to be assessed.
- Member of 'Grow Me the Money' program
- Member of Forest Stewardship Council (FSC).

### Strategies Implemented

Green Publishing's core business is educating companies to use sustainable stock and printing methods when producing their printed communications. Green Publishing offers a complete service including consultation, graphic design, typesetting and printing, with each of these services performed in a sustainable manner.

### Accolades Received

- Member of FSC
- Affiliated with various printers that hold the ISO14001 certification.
