

TRYBOOKING

www.trybooking.com

Waste Management

- Paper usage is minimised through electronic communication with clients and staff
- TryBooking assists others to reduce their carbon footprint by minimising paper usage
- TryBooking enables clients to manage registrations, payments and event ticketing online, replacing traditional paper methods
- TryBooking promotes recycling and reuses or recycles where possible.

Energy Management

- Use of florescent light globes radically reduces greenhouse gas emissions
- Recyclable inks and toners are used in all printers and photocopiers
- Bicycle parking and shower facilities allow staff to ride to work and minimises greenhouse gas emissions
- Building design makes use of natural lighting as much as possible
- Online training is offered, minimising the need for travel in order to reduce greenhouse gas emissions
- Flexible working arrangements are available, allowing staff to work from home.

Projects to be Completed

TryBooking aims to be a paperless office, and currently uses 80% recycled paper
