

SITA COACHES

www.sitacoaches.com.au

Water Management

- Recycled water is used to wash vehicles
- Fresh water for rinsing is recycled
- The coach wash bay is equivalent to a professional car wash and meets the recycling criteria of car washes taking 68 seconds to wash a vehicle.

Waste Management

- Biodegradable, environmentally friendly cleaning products are used to clean the interior and exterior of all vehicles
- Waste oil, filters and rags are collected fortnightly by EPA Licensed Waste Management and Recycling Company
- Empty oil drums are collected monthly by professional drum recyclers
- Plastic bottles and paper products are recycled in the office
- Hazmats are in place to stop spread of any fuel leakage
- Bunding is applied around oil storage areas to prevent spillage.

Energy Management

- The fleet is updated regularly to reduce emissions
- Sita Coaches ensures it keeps up with the Kyoto Treaty in regards to emissions
- Sita Coaches has euro 5 spec engines which have the engine management to reduce Co2 levels and particulate matter.

Strategies Implemented

The site has a management plan to regulate the environmental issues that may arise from time to time. Sita Coaches is constantly investigating more ways it can help reduce its impact on the environment.
